

The Evolution Control: Your Window to a More Comfortable Home.

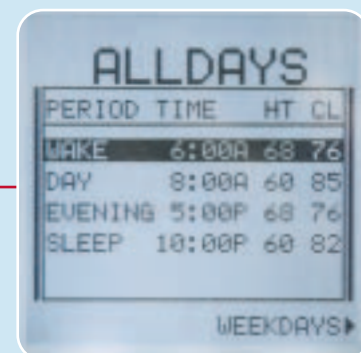

The Evolution Control is much more than just a thermostat. It is your single source of precision temperature, humidity and indoor air quality control.

The Evolution Control is intuitive, easy-to-use and feature rich. It offers the largest continuously backlit display in the industry. It automatically adjusts the heating humidity in your home to maximize comfort while reducing condensation on the windows. It tracks furnace, air conditioner and indoor air quality accessory operation and reminds you when it is time for routine maintenance.

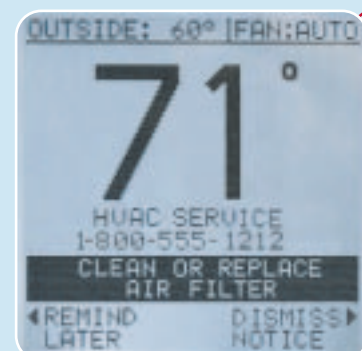

The Evolution Control also offers seven-day programmability with the flexibility to customize a comfort schedule that best matches your family's lifestyle so you can just set it and forget it.

Evolution Features and Benefits

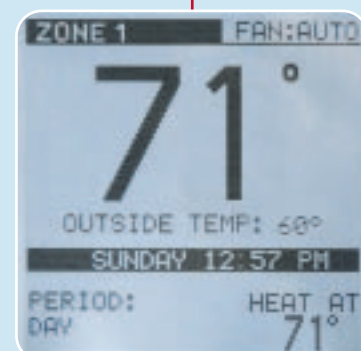

- Large, backlit, easy-to-read display
- Intuitive, on-screen prompts help walk you through setup and programming
- Programmable fan with four speed settings for customized fan control
- Accessory reminders take the guesswork out of replacing filters, humidifier pads and UV lamps
- One-button access to comfort settings appropriate for vacations or other periods of inactivity in your home.

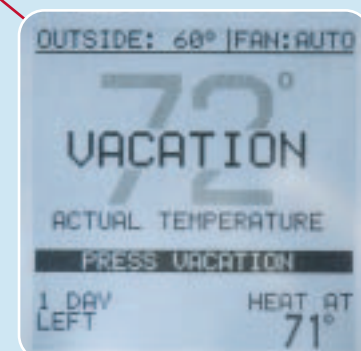

You can program one schedule for the entire week using just ONE convenient screen

Indoor air quality reminders guarantees your system will operate at its highest performance.

Optional Zoning System allows up to eight zones of temperature and fan speed control offering additional flexibility and increased comfort throughout your home.

Pre-select temperature and humidity settings for times when you are away through the Vacation function.

A Century of Reliable Comfort.

Comfort is more than just temperature settings, humidity control and indoor air quality. It's a mindset you get when you are totally confident in your ability to set your system for optimum performance. It includes knowing your system is always on alert for changes in your surroundings and follows through with reminders that it's time for you to take action. Those are the ideas that motivated our design team in developing the Evolution Comfort System.

Peace of mind comes with knowing that you have invested in a system designed, built and backed by Bryant. Bryant has provided homeowners like you a century of reliable comfort, not only with our products, but with our nationwide network of hard-working, independent dealers. Your local Bryant dealer can analyze your situation and recommend the system or system components that best suit those requirements. Offering a full compliment of Bryant products designed to meet an endless variety of needs, your local dealer is the key, and he's on board to do whatever it takes make you and your family comfortable.

As an ENERGY STAR® Partner, BRYANT Heating & Cooling Systems has determined that this product meets the ENERGY STAR® guidelines for energy efficiency.

YEAR-ROUND COMFORT

EVOLUTION™ SYSTEM
FEATURING VARIABLE SPEED
GAS FURNACES

The Ultimate Home Comfort System.

Bryant Puts Comfort, Convenience and Peace of Mind at Your Fingertips.

Bryant has provided America a century of reliable comfort, and that tradition continues with the Evolution System. The Evolution System delivers ultra quiet, extra efficient comfort with variable speed technology. It provides the enhanced humidity control of our Perfect Humidity system. It offers unprecedented ease of use with our new, intuitive and innovative comfort control. And it provides options for enhanced peace of mind with remote connectivity, improved indoor air quality, zoning and more. As we head into our second century of operation, the Evolution System offers one more example of why homeowners trust Bryant and their local Bryant dealers for solutions to all of their home comfort needs.

WARRANTY
Bryant leads the industry with a standard, 5-year limited warranty on every product we offer. The products that make up the Evolution System also offer component-specific warranties that may extend beyond the standard 5-year plan. Ask your local Bryant dealer for details and also about extended warranty programs.

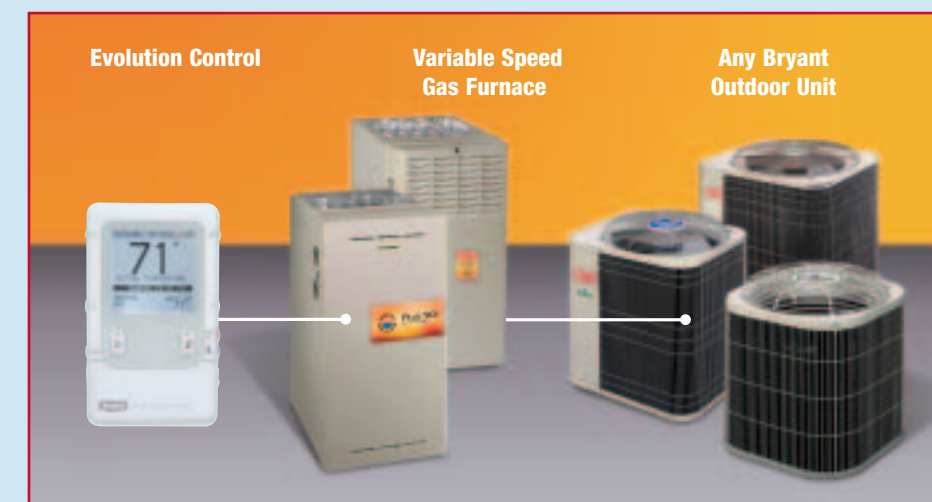

The Comfort of Variable Speeds and the Simplicity of Evolution.

In its most basic form, the Evolution System requires a variable speed gas furnace, the Evolution Control and any Bryant air conditioner or heat pump. That means you'll enjoy the enhanced comfort provided by variable speed technology — longer heating and cooling cycles for consistent temperatures throughout your home, money-saving energy efficiency and extra-quiet operation. With the option to add a two-speed outdoor unit, wireless remote system monitoring, indoor air quality products and zoning, the Evolution System can be configured to meet a virtually endless variety of indoor

comfort needs and consumer preferences. It's a total system solution, designed, built and backed by the most trusted name in comfort: Bryant.

The Evolution of Comfort

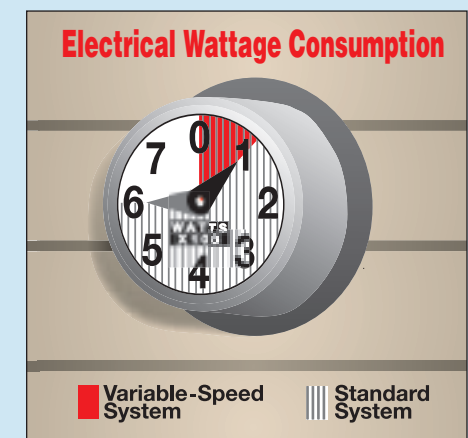

The Evolution System is available in a variety of equipment combinations. Ask your Bryant dealer which system components are right for your home and climate.

Evolution Performance and Benefits.

VARIABLE SPEED GAS FURNACE

The cornerstone of the Evolution Comfort System is a Bryant variable speed gas furnace. Bryant variable speed gas furnaces provide a nearly continuous flow of warm, heated air to provide soothing, quiet comfort all year long.

Bryant variable speed furnaces provide consistent air circulation with about one-sixth less energy consumption than a fixed-capacity model.

“Smart” electronics keep track of previous cycles and allows the system to automatically select the correct furnace settings for the best possible combination of comfort and energy efficiency. This is a feature we call Perfect Heat, the perfect solution for warm, winter comfort.

TWO-SPEED AIR CONDITIONER OR HEAT PUMP

You can add cooling to the Evolution System with any Bryant air conditioner or heat pump. However, for maximum comfort, energy efficiency, and system connectivity, we recommend our Two-Speed Puron Plus. This two-speed model spends about 80% of its operating time on low speed to deliver quiet, money saving cooling as well as comfort-enhancing humidity control.

The Two-Speed Puron Plus delivers high efficiency, 16 SEER (Seasonal Energy Efficiency Ratio) cooling using the environmentally sound Puron® refrigerant. Our Puron refrigerant products are the most reliable of any we offer.

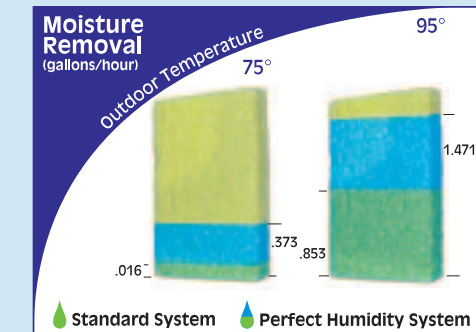

10 SEER Model

16 SEER Model
 **\$63**

For every \$100 you would spend to cool your house using a 10 SEER system, a 16 SEER system should cost about \$63.

PERFECT HUMIDITY

The Bryant Evolution System also provides the enhanced humidity control of our Perfect Humidity System. Most home comfort systems manage humidity during heating or cooling cycles. These systems typically require two separate controls, one for temperature, and one for humidity. Bryant's Perfect Humidity system manages moisture levels independent of heating or cooling demand with one convenient control.

The Evolution System with Perfect Humidity can provide up to 128% more moisture removal than a standard system.

Perfect Humidity will not only deliver greater comfort, it can help reduce condensation build up on windows. Perfect Humidity can also help you save money by making you feel more comfortable at higher set temperatures in the summer and lower set temperatures in the winter.

Bryant Provides Options For Making A Great System Even Better.

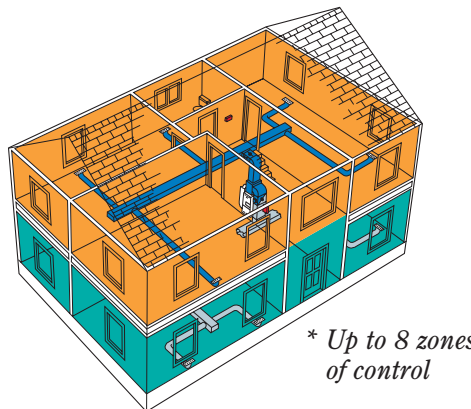

Enhanced Indoor Air Quality

The Evolution System improves indoor air quality in a variety of ways. It offers the patented TrueSense™ dirty filter detection that can automatically monitor the actual performance of your whole-house filtration system. The system will notify you when it's time to change the media filter, humidifier pad and UV lamps. It also offers customized fan control with high, medium, low and auto settings. In addition, improved air circulation through the continuous fan function allows the system's filters to spend more time removing unwanted airborne pollutants.

ZONE CONTROL OPTION:

The Evolution System is the perfect choice for zoning applications. This system monitors airflow and automatically makes adjustments to ensure each zone receives the correct temperature, humidity and air circulation.

* Up to 8 zones of control

Stay Connected For Comfort And Peace Of Mind

Add our remote access kit for 2-way wireless access to system control, information and diagnostics. You or your Bryant dealer can access vital system information by phone or by internet, with no phone lines. This option provides peace of mind knowing that no matter how far you are from home, you can always monitor your system's operation. In fact, the system will contact you in the case of an emergency. And, your dealer can examine system operation without ever leaving the office.*

* Remote Connectivity available mid 2004.
